Cyber Risk Management Services

Cybersecurity Services for SAFER Members

Public education institutions are frequently targeted by cyber adversaries in an attempt to facilitate a data breach or similar event. SAFER members have access to an extensive portfolio of cybersecurity services powered by Firestorm Global to help assess, manage and optimize their cyber risk.

Cyber Risk Assessment

Structured cybersecurity risk assessment including a 2 ½ hour discovery engagement, external risk analysis and comprehensive engagement report.

vCISO Consultations

Information Security advisory sessions designed to address challenging, complex, and emerging topics. Typically conducted in 30 or 60-minute increments.

Incident Response Plan

Incident Response template and plan review customized to meet public education requirements and align to SAFER program process.

Tabletop Exercises (Virtual)

Remote-facilitated drills engaging cross-functional or technical teams to simulate realistic attack scenarios.

Vendor Risk Assessment (L)

Evaluation of vendor risk through external analysis and security questionnaire. Typically for purchases exceeding $250K.

RFP Review (L)

Review RFP material and submissions for cybersecurity concerns and inclusion. Typically for purchases exceeding $250K.

Attack Surface Assessment

Discovers and reviews public-facing assets that threat actors could potentially exploit.

Dark Web Exposure Analysis

Identifies compromised credentials found on the dark web that threat actors utilize to gain internal system access.

Web Application Scan

Testing of public facing institution-owned web applications for potential security concerns.
